

 BUILT ON MICROSOFT POWER PLATFORM

PxM: Your AI-powered Business Management Solution for Strategic Excellence

Connect strategy, execution, and performance – from vision to value.

 UNIFIED PLATFORM

What is PxM

Your next-gen, AI-powered Business Management Suite

PxM is your next-generation, AI-powered business management platform that unifies Strategy Planning, Execution, and Performance into one seamless, centralized experience. Designed for Strategy Offices, Enterprise PMOs, and Performance Leaders, PxM empowers enterprises to lead with clarity, agility, and sustained impact across the full strategic lifecycle – from vision to value.

Built natively on the Microsoft Power Platform and integrated with Microsoft 365 and Dynamics 365, PxM connects the entire strategy value chain – from planning and prioritization to delivery, performance, and results. Its modular suite spans Strategy, Demand, Portfolio, Program, Project, Performance, Benefit, and Resource Management, all interconnected within a unified environment. Coupled with a powerful integration ecosystem that ties together data, workflows, and external governance and performance frameworks, PxM elevates strategic planning, strengthens governance, and enables intelligent execution that consistently delivers measurable, sustained value across the enterprise.

 360° VALUE

Why PxM

From Fragmented Processes to Connected Intelligence

Digital Governance

PxM centralizes digital governance by ensuring full alignment, traceability, and overview across all governance processes, while embedding world-class reference models and methodologies.

Industry-scale Solution

PxM is designed for Strategy and Transformation Offices (STOs) operating across diverse industries – from government and large enterprises to industry-scale STOs.

AppSource Ready

PxM is published as a GA solution on Microsoft AppSource, making it accessible to customers, partners, CSPs, and implementation teams through a unified marketplace experience.

Microsoft Cloud

PxM seamlessly integrates Microsoft 365 collaboration tools, Dynamics 365 business applications, and the broader Microsoft Cloud and Azure ecosystem – unifying data, workflows, and processes within a single connected platform.

 MODULAR SUITE

PxM's Core Architecture
One Ecosystem. Every Strategic Function Connected.

Strategy Management

Shape direction with Strategic Clarity by aligning strategies, perspectives, objectives, and KPIs across departments. PxM helps leadership define measurable objectives and visualize progress across the value chain.

Demand Management

Prioritize the right opportunities based on strategic value, feasibility, and capacity. PxM governs ideas and business cases with structured evaluation, scoring, and visibility – ensuring only the right initiatives progress.

Portfolio Management

Invest in the right initiatives, every time, by translating strategy into an optimized, executable portfolio. PxM applies intelligent prioritization, scenario modeling, and feasibility analysis to balance value, risk, and capacity.

Program Management

Coordinate complex, multi-project programs with clarity and control. PxM aligns milestones, dependencies, risks, and outcomes across projects – providing real-time visibility to ensure programs deliver strategic value.

Project Management

Deliver initiatives efficiently with structured planning and automated tracking. PxM combines PMI best practices, Microsoft 365 collaboration, and AI-powered assistance to ensure consistent and transparent project execution.

Performance Management

Measure what matters most. PxM enables continuous tracking of KPIs, outcomes, and performance trends, providing actionable insights to optimize productivity and achieve strategic excellence.

Benefit Management

Realize and sustain business value through a transparent benefits framework. PxM quantifies impact, validates results, and ensures every investment delivers measurable and strategic outcomes.

Resource Management

Maximize talent and capacity with dynamic resource allocation and workload forecasting. PxM uses AI-assisted matching, capacity modeling, and skills-based planning to balance demand, feasibility, and execution readiness.

Solutions that Scale

Scalable solutions built to evolve with your strategy

Government & Public Sector
Delivering Strategic Governance, Transparency, and Measurable Public Value

Enterprise & Corporate
Turning Strategy into Competitive Advantage
